Mezzanine Floors

Suitable for Industrial, Retail, Office, Storage/Production Environments

European Mezzanine Systems are a specialist flooring manufacturer, creating bespoke mezzanine flooring systems to suit any company's individual needs – no matter how large, or small. Dealing with trade only customers, and selling to resellers, distributors and contractors, we are able to offer a complete high quality solution from design to installation. While ensuring that your end user will receive a first class product at all times.

From our 10,000 sq. ft manufacturing facility, we offer a tailor made service combining experience, support and intelligent solutions to meet the requirements of any business. We also manufacture staircases, fire escapes and supply gates, handrails and edge protection systems, as well as fire protection, and project management for building control and conformity.

Why Choose European Mezzanine Systems

- All our projects are designed to suit your individual customers requirements
- Manufactured in Wolverhampton, West Midlands, United Kingdom
- In-house CAD design and Project Management services to support you
- The most cost effective way to increase floor space
- Modular systems that can be dismantled and relocated
- Minor disruption through using specialised installation teams
- Creates additional office/retail space and storage/production space
- The quality and service you would expect from a specialist manufacturer

European Mezzanine Systems Ltd have been trading for over 11 years, and our staff have a combined 70 years industry experience, giving you the confidence from a manufacturer that can deliver quality products, on budget, and on time. We can manufacture and supply:

- Mezzanine Floors
- Handrail and Edge Protection Systems
- Access and Safety Gates
- Fire Protection Systems
- Staircases and Fire Escapes
- Suspended Ceilings

Quality of Service

Our mezzanine floors are designed and constructed to suit a customer's individual specification and the existing building structure. Pricing from our bespoke software, we are able to offer a fast turn around free quotation service to suit your business needs.

We work closely with your sales and project managers to ensure the smooth transition from enquiry to installation, and offer the support you would expect from an experienced high quality manufacturer.

We typically follow a set procedure for all customers, thus ensuring a smooth transition from enquiry to installation:

- Detailed Site Survey – Initially by the agent, and with our support if required.
- Design – Our team will use bespoke software to design the floor.
- Site Specific Drawing – This drawing is to be signed off by the end user or agent's Project Manager so it is compliant with our procedures.
- Submit a Building Regulations request to the Local Authority for Certification. EMS will take full responsibility for obtaining all building control and fire regulation requirements if the agent can't do this for the end user.
- Commence and complete Mezzanine Floor manufacture.
- Deliver to site on a set date, whereby the site is deemed ready to accept the delivery and installation of the mezzanine floor/staircase/fire escape/ceiling.
- Installation is done in line with CDM & HSE guidelines. The EMS installation team is fully accredited and trained in the installation of mezzanine floors, staircases, fire escapes and suspended ceilings. However, the client has the option of installing their own mezzanine floor.

For enquiries to EMS, or to become a reseller through our "Partnership Programme" email us on sales@mezzstore.com or call us on 08452 609 601.

If you are an end user and would like a quotation for a mezzanine floor, staircase or fire escape, please call or email us, and we will put you in touch with one of our preferred partners from our Partner Programme.

We price competitively and we support our trade customers
